

Accelerate & Diversify Your Metabolics Program

Alliance Clinical has a robust database of diverse, prescreened participants available across seven fully integrated sites. At each, community outreach, free healthcare services, and personalized support help speed enrollment and reinforce retention. Count on Alliance to meet your key study milestones—starting with FPI.

30+ metabolic trials in the past 5 years

700+ prescreens per month

280,000+ database of consented, prescreened participants

85% of database from minority populations

>20% of database 65+

Proven Expertise in a Broad Range of Metabolic Areas

Diabetes

NASH

Obesity

Diabetic Neuropathy

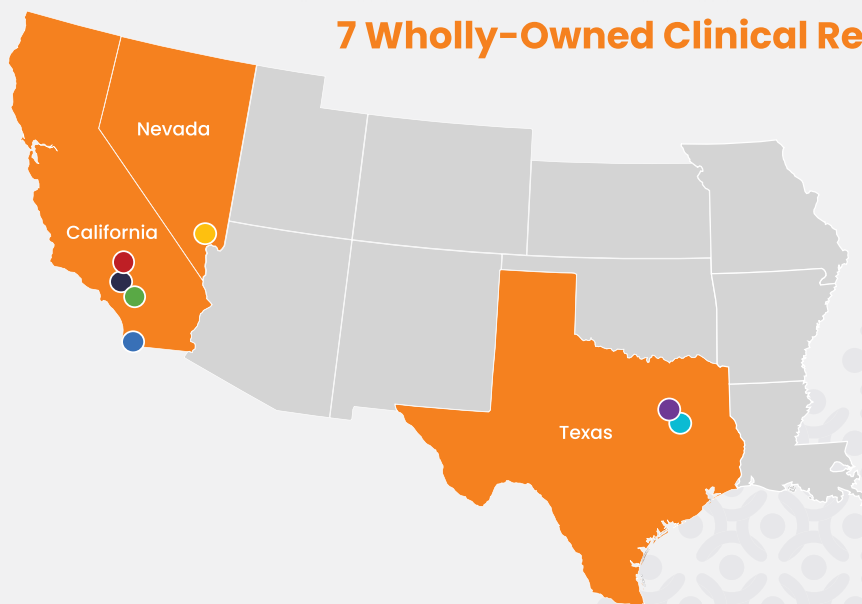

Diabetic Retinopathy

Hypertension

Hypercholesterolemia

Hypertriglyceridemia

Three Keys to a Successful Metabolic Study

Rapid Study Startup. Audit-Ready Data. Diverse Participant Population.

Rapid Study Startup Enables Brisk Enrollment

We begin with a proprietary database of 280,000+ prescreened participants. Harnessing technology, we then quickly identify and contact appropriate candidates across our sites, proactively scheduling them in anticipation of site activation. This accelerates time to FPI.

Our unfettered access to allied professionals, including dietitians, mental health professionals, diabetes educators, ophthalmologists and weight loss specialists, helps bolster patient retention and underpin your trial success.

Comprehensive Focus on Quality Produces Audit- Ready Data

We use a streamlined visit management process that allows us to efficiently consent and treat participants with minimal downtime and maximum quality. We bolster that with:

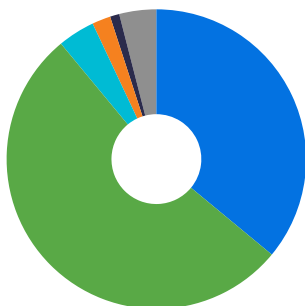

- Overnight quality control on 100% of visits
- Automated eSource exception reporting
- Ongoing third-party internal audits

These tactics—implemented across all projects—enable us to catch and correct issues in near real time. The result: conclusive, audit-ready data for your clinical study.

Intentional Design Delivers Diverse Participant—and Staff—Population

Establishing purpose-built study sites in communities and cities with underrepresented residents, Alliance Clinical places a deliberate focus on helping ensure that innovative new therapies are effective across populations.

Breakdown by Race

- Caucasian: 36%
- Black/AA: 53%
- Asian: 4%
- American Indian & Alaska Native: 2%
- Native Hawaiian & Pacific Islander: 1%
- Other: 4%

Breakdown by Ethnicity

Hispanic/
Latino: 38%

Not Hispanic/
Latino: 62%

About Alliance Clinical Network

Alliance Clinical's fully integrated, wholly owned and operated clinical research sites help advance human health by delivering exceptional clinical trial data gathered from a proprietary database of 280,000+ consented participants. Our centralized management harmonizes processes and systems to deliver consistent study execution across our seven sites—a solid foundation from which to meet your study needs.
